

ELLIS PHD PROGRAM | ADMISSION FORM INDUSTRY TRACK

ELLIS Fellows, Scholars, and Unit Faculty participating in the central recruiting may finalize the candidate's admission to the ELLIS PhD Program by completing this form and signing the Letter of Intent. The advisor should email the completed and signed form to phd@ellis.eu, with the subject line: *Admission - [candidate's name]*.

PHD STUDENT

Name

Personal website
Institution
Country

Personal details (internal use only)¹

Year of Birth Gender m f x Nationality

ACADEMIC ADVISOR

Name
Email
Institution
Country
Role in ELLIS Fellow Scholar Member

INDUSTRY ADVISOR

Name
Email
Affiliation
Country
Role in ELLIS Fellow Scholar Member None (*)

(*) Membership exception: Industry representatives may become Industry Track advisors if they are not ELLIS Fellows, Scholars or Members so long as they have already published a paper together with the applying student candidate as a result of their collaboration, in a top-tier venue in machine learning or related sub-fields (see <http://ellis.eu/members> for a full list of accepted publications).

Does the Industry Advisor fulfill the membership exception? Yes No

If so, please provide a full citation of the publication, including an official link to the publication (e.g. DOI).

PROJECT DATA

Project dates (start/end of the PhD)

Details about the collaboration: What is the relation of the academic and industry partners? Do they already have an ongoing collaboration (e.g. a joint research lab) or shared projects? What is the primary location for the industry collaboration?

¹ Personal data such as year of birth, gender and nationality can be optionally provided by the student for internal use and will *not* be published on the ELLIS website. We collect diversity data for two purposes: first, we use aggregate group data for reporting purposes to describe the demographics of the ELLIS cohorts as a group without disclosing personally identifiable information. Second, ELLIS values diversity and is committed to building a more diverse and inclusive community; analysis of diversity data helps us gain insight into the composition of our student cohorts, identify trends and define future initiatives.

PROJECT DATA

Title of the PhD project

Abstract of the PhD project (5-20 sentences)

LETTER OF INTENT

The purpose of this Letter of Intent is to demonstrate that the academic advisor, the industry advisor and the PhD student acknowledge the terms of the ELLIS PhD Program's Industry Track, and understand that these terms should be met for the PhD student to receive the title and certificate of 'ELLIS PhD Student', and all related benefits.

Academic advisor	
Industry advisor	

Terminology

- "Academic partner": the accredited postsecondary academic institution participating in the collaboration from which the degree of PhD will be obtained.
- "Industry partner": an entity participating in the collaboration which is not an accredited academic institution, is not capable of granting accredited academic degrees, and for whom academic research and publication are not central activities. This may be a corporation, company, non-profit organization, or government entity, and which agrees to participate in the supervision of the PhD student's research via the industry advisor.
- "Academic advisor": an affiliate of the academic partner that has been approved by the academic partner to supervise the PhD student's research.
- "Industry advisor": an affiliate of the industry partner that has been approved by the industry partner to represent the industry partner in the supervision of the PhD student's research. The industry advisor supports the academic advisor in their responsibilities regarding academic support and supervision for the PhD student's research.

Terms of the ELLIS PhD Program

1. The advisors provide funding for the PhD student (min. 3 years overall) according to the proposed funding plan below.
2. All parties acknowledge the proposed time-sharing agreement below.
3. All parties acknowledge the proposed graduation plan below.
4. It is expected that PhD students in the program will publish the results of their research in top-tier venues in machine learning-driven fields.
5. It is expected that Intellectual Property (IP) generated during the research project will be arranged between the partners. The ELLIS Society does not claim any IP.
6. It is expected that the PhD student will spend at least 50% of their time at the academic partner and at least 6 months with the industry partner over the course of their entire appointment. The exact partition of the time is flexible, and up to the partners to arrange.

In the case that there is already a joint effort focused on fundamental research between the partners at one site (e.g. a joint research lab or industrial research lab), and this is where the candidate will conduct their research, then the candidate and both advisors agree to meet together at least 6x/year (bi-monthly). This second case is subject to approval by the ELLIS PhD and Postdoc Committee and ELLIS Board.

Proposed funding agreement between the hosts

Specifies tentatively who funds the PhD student during which period of time.

Proposed time-sharing agreement between the hosts

Specifies tentatively how the PhD student will split their time between the two partners.

Graduation plan

Specifies the institution from which a degree shall be obtained and the tentative date.

Graduate school (only applicable if the local PhD program is a US-style graduate school)

Please check the box below if this statement applies and add any additional terms in the comment box.

At the above-named home institution, students do not have a fixed assigned supervisor when they start their PhD, and are allowed to affiliate with a certain group or supervisor at a later point in time. This letter only expresses an offer for supervision; any party may unilaterally terminate this offer or withdraw from it. The PhD student can be admitted to the ELLIS PhD Program, but will need to meet the ELLIS requirement in terms of the advisor's role in ELLIS (i.e. co-supervision by 1 ELLIS Fellow/Scholar/Unit Faculty + 1 ELLIS Fellow/Scholar/Unit Faculty/Member) to be able to stay in the program after they have chosen their supervisor.

Admission to the ELLIS PhD Program

After (1) signing this Letter of Intent and (2) being approved by the ELLIS PhD and Postdoc Committee, the PhD student will be officially admitted to the ELLIS PhD Program and will be listed on the website as an 'ELLIS PhD Student'. ELLIS has the right to retract the title 'ELLIS PhD Student' in case the conditions are not fulfilled.

During their PhD, candidates are expected to fulfill the following basic requirements:

- The PhD student must publish at least one first-author paper in a top-tier venue in machine learning-driven fields: NeurIPS, ICML, ICLR, JMLR, CVPR, ICCV, ECCV, IJCV, PAMI, RSS, CoRL, ACL, EMNLP, KDD, AAAI, IJCAI, COLT, UAI, AAMAS, AISTATS, TACL, SIGIR, WSDM, or Web Conference (not including workshops). Note that the list of journals and conferences may be extended by the ELLIS Board in the future.
- Work exchange requirements:
 - **EITHER** the candidate will spend a minimum of 50% of their time at the academic partner institution AND the candidate will spend a minimum of 6 months with the industry partner. This time can be accumulative (e.g. 2 days per week) or consecutive (e.g. a block similar to an internship).
 - **OR** if there is already a joint effort focused on fundamental research between the partners at one site (e.g. a joint research lab or industrial research lab), AND this is

where the candidate will conduct their research, then the candidate and both advisors agree to meet together at least 6x/year (bi-monthly). This second case is subject to approval by the ELLIS PhD and Postdoc Committee and ELLIS Board.

After obtaining their PhD, candidates who have fulfilled the basic requirements of the ELLIS PhD Program's Industry Track will receive an ELLIS certificate and be listed on the Alumni page as ELLIS graduates. If the basic requirements have not been fulfilled upon graduation or completion of the appointment, the ELLIS PhD and Postdoc Committee will not award the ELLIS certificate and the student will not be listed as an ELLIS graduate.

Signatures

This Letter of Intent is not legally binding, is intended to provide a tentative overview of the proposed PhD student activity, and does not overrule applicable regulations of degree-granting institutions. It is in addition to any requirements / contracts the PhD student must fulfill (e.g. the employment contracts by the partners, etc.), and only provides access to ELLIS Society benefits granted through the ELLIS PhD Program. ELLIS has the right to retract the title 'ELLIS PhD Student' and related benefits in case the terms are not fulfilled.

Any party may unilaterally terminate all discussions pursuant to this Letter of Intent or withdraw from this Letter of Intent at any time without liability for such termination or withdrawal. No license (express or implied) of intellectual property rights is granted under this Letter of Intent. No party will have any liability to any other party for any direct or indirect damages or damages of any nature as a result of this Letter of Intent.
